

# Genasys Protect ACOUSTICS

*Keep people safe with reliable communication.*

Genasys Protect ACOUSTICS provides alerting and communication **redundancy** in emergencies with **highly audible and intelligible outdoor messaging**, even to people and vulnerable populations that have not signed up for alerts. Broadcast specific emergency response communications in multiple languages through a network of connected outdoor acoustic devices.

Genasys Protect ACOUSTICS **work even when power and cellular networks are down**, with solar power, battery back-up, and satellite connectivity.

## **360 Degree & Directional Acoustic Devices**

Augment emergency communications channels with state-of-the-art, always on and remotely managed acoustic devices that provide clear and understandable instructions to the public.

## **Multi-Channel Alerts**

Acoustic devices help saturate your notification area by combining with other alerting channels, including SMS, voice calls, social media, TV, radio, digital signage, websites, mobile apps, and more.

## **Increased Redundancy and Reliability**

Enhance communication reliability with live or recorded instructions through intelligible speakers even if power infrastructure is down, and network connectivity is impacted.

## **Public-Facing Awareness**

Voice commands reach impacted people immediately, independent of other notification infrastructure. Send one message for all or custom messages to each location.

*"Our alert and warning plan uses text messages, social media, and outdoor warning system speakers from Genasys. During the Emerald and Coastal fires, we used Genasys as part of a multi-faceted system to issue voluntary and mandatory evacuation notifications. If we lose cell towers or electricity during a disaster, the outdoor warning system, which includes satellite connectivity, solar power, and battery backup, is our failsafe." – **Brendan Manning, Emergency Operations Coordinator, Laguna Beach, CA***

# Genasys Protect Acoustic Devices for Superior Protective Communication

Use intelligible 360 & directional acoustic devices to communicate with population that is spread across a large area. Highly distributed cloud based dashboard allows emergency manager to manage multiple groups of speakers from a web based dashboard or remotely from the mobile app. Ensure safety information reaches people quickly.

Genasys Protect acoustic devices provide mission critical and actionable information throughout emergency events. Gain the confidence that comes from knowing your response plans are fully tested and backed by a partner with more than four decades of front-line experience.

## Genasys Acoustic Devices

**DS-60XL**  
Range: 300m - 3,600m

A smaller footprint allows for installation nearly anywhere. Fill gaps in alert areas with this flexible solution from 60 to 360 degree coverage.

**360XL-MID**  
Range: 800m

Lightweight and compact form allows easier transportation and installation while also benefiting from lower power.

**360XT**  
Range: 2,238m

With a self-contained trailer, this device provides a mobile set-up which provides you with the flexibility to plan for upcoming events.

**360XL**  
Range: 3,548m

Broadcast live or recorded messages which can be heard above crowd and background noise to ensure every message is clearly delivered.

*"These speakers/sirens can be activated to alert people who are outdoors of an imminent threat to life safety that requires individuals in the affected area to seek more information and take the appropriate protective action,"* – **Keith May, Deputy Fire Chief, City of Berkeley**

## Genasys: Global Provider of Protective Communications Solutions

Protecting people and property for over 40 years and covering over 70 Million people in more than 100 countries worldwide, including more than 500 cities, counties and states in the U.S., as well as more than half of all California counties.
